Free snowflake knitting charts

The 9 charts are 7 single snowflakes from 5 to 25 stitches wide, worked flat, and 2 repeats worked in the round. Read row 1 at the bottom: on a flat chart, right-side (odd) rows are read from right to left and knitted, and wrong-side (even) rows from left to right and purled. The chart shows the right side of the knitting.

The repeats are worked in the round. Every round is a right-side round, so every row of the chart is read from right to left, again starting at the bottom. The cast-on for a repeat has to be a multiple of 6 stitches, and the chart is worked again and again to the end of the round.

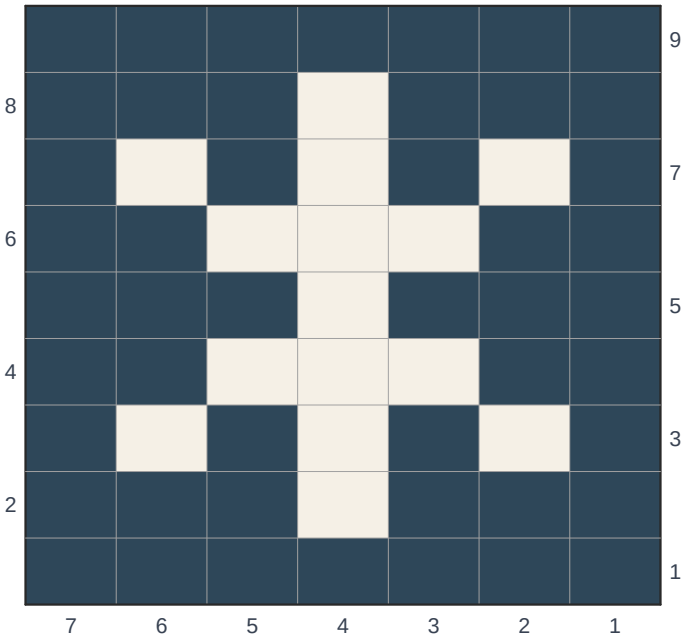

Every snowflake has six arms. The single snowflakes are drawn with a straight arm and four one-stitch-per-row diagonals: at a knitted gauge a diagonal sits at about 36 degrees to the horizontal instead of the 45 degrees of square graph paper, much nearer the 30 degrees of a real snowflake's side arms. The 25-stitch snowflake uses 20 rows for its straight arm and 12 diagonal steps, so all six arms knit to about the same length. For the smallest snowflakes, duplicate stitch is quickest; for the bigger ones, stranded knitting avoids the many bobbins intarsia would need, and the repeats use 2 colors per round with a longest float of 5 stitches.

To change the colors, size or gauge, open any chart in the free editor at knittingchart.com/snowflake-knitting-chart. The editor previews the motif in your own stitch proportions and exports a fresh PDF with the color key and written instructions. These charts are free to knit, change and use in your own projects and patterns.
